Hi Clovis,

Let me ask TXOGA for clarification and get back to you, thanks!

Jonathan,

Can you clarify what is being referred to by the "10 day differential?" (see Kurt's reply to my email below).

---Clovis

Subject: RE: RA Talkers - TX Oil and Gas Association Meeting

Can you clarify what you mean by 10 day differential? Is this the end of the Federal RVP season (9/15) relative to the extended TX SIP season (9/30?)

Hi Kurt,

I was hoping you could give us some insight into an issue that our RA has been asked to speak about at an upcoming Texas Oil and Gas Association (TX OGA) meeting next week.

Apparently, the TX OGA feels that the 10 day differential for RVPs can be an issue with a hurricane incident. What flexibility/discretion (if any) do we have in such situations and what information/discussion might the RA be able to share with the TX OGA on that topic?

Thanks in advance for your help and assistance.

Sincerely,

---Clovis

Subject: RA Talkers - TX Oil and Gas Association Meeting

Hi all,

Could yall provide some talkers/background info for the following topics? It's for the RA's talk at the Texas Oil and Gas Association Meeting next week. The red font text is the latest I have received about the topic.

Thanks!

A few topics that our members mentioned for RA McQueen to speak about:

- Status of the withdrawal publication of SSM SIP Call
 - 8/26/19 - We are evaluating all comments received and anticipate briefing senior management in September as we continue development of a final action. All comments received are available online in the docket for this action at regulations.gov. It would be not be appropriate to discuss any details of the anticipated final action. Due to the complex nature of the comments received, along with competing priorities and workload considerations, we are unable to provide an anticipated date of final action at this time.
- RVP Standards for counties—10 day differential can be an issue with a hurricane
- Update on air monitoring via fly overs (I have an issue paper on this, any update?)
